Optimizing Successful Aging 14th Annual Symposium on Aging

February 28, 2015

Columbia Conference Center
169 Laurelhurst Avenue
Columbia, SC

Jointly sponsored by:

The South Carolina College of Pharmacy

Providence Hospitals

USC College of Nursing

SC Center for Nursing Leadership

PROVIDENCE HOSPITALS

TARGET AUDIENCE:

This symposium is designed for healthcare educators and researchers, primary care physicians, pharmacists, nurse practitioners, nurses, and physician's assistants.

EDUCATIONAL OBJECTIVES:

Upon completion of this program, the participant will be able to:

- Review the science of pharmacogenomics and the clinical utility of DNA testing
- Describe the clinical applications of pharmacogenomics when treating older adult populations
- Address the potential future of pharmacogenomics and how it will be applied to personalize clinical medicine
- Describe medical and surgical treatment options for fragility fractures in the geriatric population
- Describe the challenge of cartilage resuscitation
- Discuss source of stem cells and how they may function
- Discuss the results of stem cell infusion for the older adult
- Describe the cognitive changes that occur with aging and how to maintain cognitive vitality
- Discuss the implications of plaques and tangles in healthy adult brains
- Describe new molecular entities marketed in 2014
- Discuss new medications and the clinical significance in primary care and geriatric settings
- Review the impact of new molecular entities on clinical practice including new safety warnings
- Reinforce best practices and placement in therapy for these new agents

EDUCATIONAL METHODS:

Lecture presentations with time for questions and answers and case studies will be utilized to facilitate the exchange of information and audience participation.
